**Pda 2020 Introduction**

# INTRODUCTION

---

Following changes made by Apple to their iOS in autumn 2019 it was necessary to re-write the successful **AUTOGLAZEIT Pda** offline application to allow it to continue to operate on the iPhone if using iOS 13.x, as well as Android smart phones.

The decision was also taken to include changes that had been added to our development list by our users over the past year which, in brief, are:

Set PDA Options For All Devices

- Force Mileage Input
- Force Signatory Name Input
- Force Van Inspection
- No Visibility Before Given Time Of Day :
- View Of Tomorrows Jobs
- Allow Material Selection
- Allow Snagged Status Change
- Force Pre-Inspection
- Force Quantity Of Bond Used

Update All Accounts

# FORCE MILEAGE INPUT

Previously it has been compulsory to enter the mileage of the vehicle being worked on. As many companies do not require this option a '0' was often used so this is now an option in the set up.

Set PDA Options For All Devices

- Force Mileage Input
- Force Signatory Name Input
- Force Van Inspection
- No Visibility Before Given Time Of Day :
- View Of Tomorrows Jobs
- Allow Material Selection
- Allow Snagged Status Change
- Force Pre-Inspection
- Force Quantity Of Bond Used

# FORCE SIGNATORY NAME

Previously it has been compulsory to enter the name of the signatory on the “Pre-Inspection” and “Final Inspection” pages. This is now a configurable option in the set up.

Set PDA Options For All Devices

# VIEW TOMORROWS JOBS

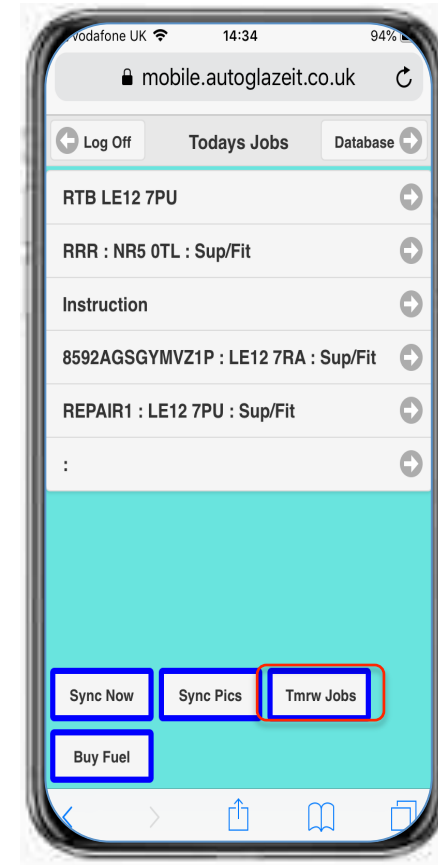

Some users do not want their fitters to have sight of tomorrows jobs until the day, so this is now a set up option.

Set PDA Options For All Devices

- Force Mileage Input
- Force Signatory Name Input
- Force Van Inspection

No Visibility Before Given Time Of Day :

- View Of Tomorrows Jobs
- Allow Material Selection
- Allow Snagged Status Change
- Force Pre-Inspection
- Force Quantity Of Bond Used

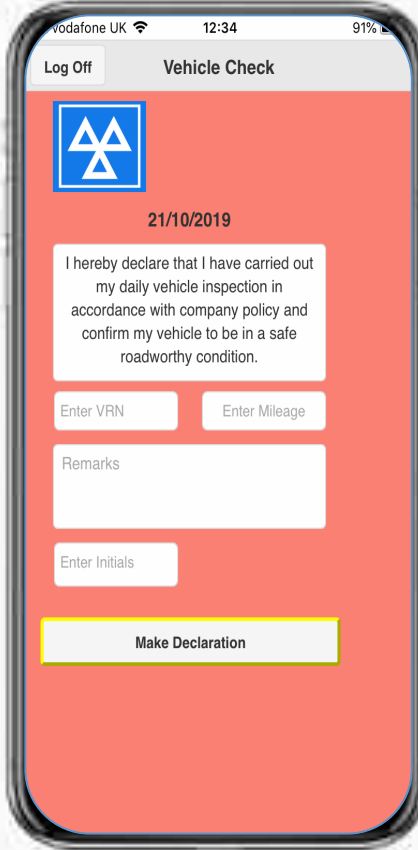

# FORCE VAN INSPECTION

---

This is a new feature that has been requested by a number of users, all for differing reasons. Basically this compels the van driver to inspect their vehicle at the start of each working day to declare that the vehicle is fit for use. Once declared fit, the drivers are able to see their jobs, but only after the pre-designated visibility time.

To prevent early inspections taking place a time restriction can be put on the release of jobs to the Pda device.

The screenshot shows a mobile application interface for 'Vehicle Check'. At the top, there is a status bar with 'vodafone UK', signal strength, '12:34', and '91%' battery. Below the status bar, there is a 'Log Off' button and the title 'Vehicle Check'. The main content area has a red background. It features a blue square icon with a white triangle symbol. Below the icon, the date '21/10/2019' is displayed. A white text box contains the declaration: 'I hereby declare that I have carried out my daily vehicle inspection in accordance with company policy and confirm my vehicle to be in a safe roadworthy condition.' Below this text box are two input fields: 'Enter VRN' and 'Enter Mileage'. There is also a 'Remarks' text area and an 'Enter Initials' input field. At the bottom, there is a yellow 'Make Declaration' button.

# ALLOW MATERIAL SELECTION

Another new feature. Setting this option will list on the Pda all materials booked to the job. (*Glass, clips, trims etc*) All items will be marked as used with an 'X' in the box, but, if allowed, the fitter can uncheck an item if not used.

Set PDA Options For All Devices

- Force Mileage Input
- Force Signatory Name Input
- Force Van Inspection
- No Visibility Before Given Time Of Day :
- View Of Tomorrows Jobs
- Allow Material Selection
- Allow Snagged Status Change
- Force Pre-Inspection
- Force Quantity Of Bond Used

# ALLOW SNAGGED STATUS CHANGE

---

This is another new feature that has been requested by a number of our users for when a fitter attends a job but there is a 'snag' and the work cannot be carried out at that time.

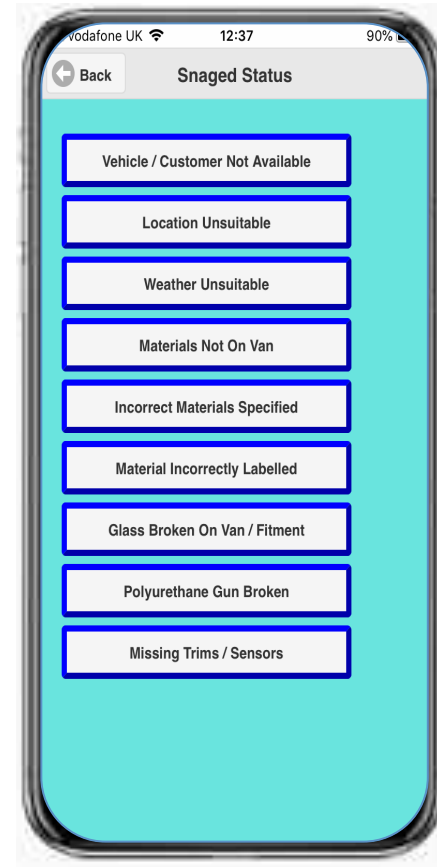

# ALLOW SNAGGED STATUS CHANGE

---

There are 9 reasons pre-set in the system for snagged status.

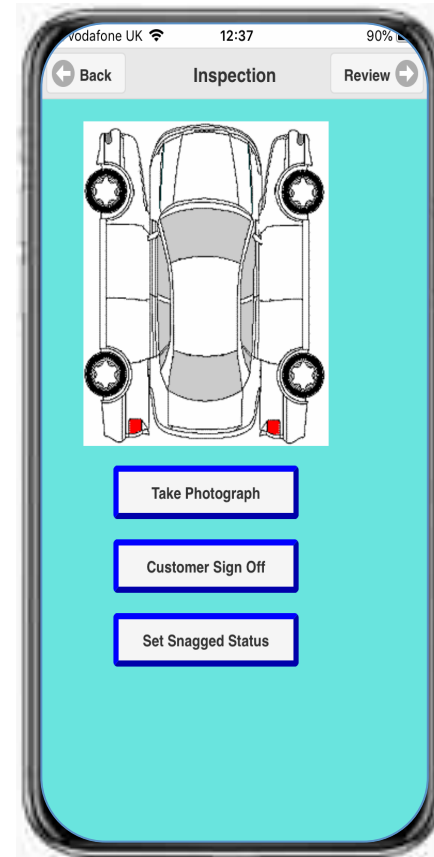

# FORCE PRE-INSPECTION

A request from many users is to make the pre-inspection sign off an option. This is now available.

Set PDA Options For All Devices

- Force Mileage Input
- Force Signatory Name Input
- Force Van Inspection
- No Visibility Before Given Time Of Day :
- View Of Tomorrows Jobs
- Allow Material Selection
- Allow Snagged Status Change
- Force Pre-Inspection
- Force Quantity Of Bond Used

# FORCE QTY OF BOND USED

Another new option is to force the fitters to declare the number of tubes of bond used on a job for the purpose of stock control and performance monitoring. The figures collected can be reported on, allowing tubes of bond to be allocated to a van as stock items and for stock checking to take place to ensure none has been accidentally lost.

Set PDA Options For All Devices

- Force Mileage Input
- Force Signatory Name Input
- Force Van Inspection
- No Visibility Before Given Time Of Day :
- View Of Tomorrows Jobs
- Allow Material Selection
- Allow Snagged Status Change
- Force Pre-Inspection
- Force Quantity Of Bond Used
